

With *low* equipment, operational and maintenance *costs*,
Air King industrial air cleaners are an *economical* way to
improve your overall *air quality*.

M-40

Air King

industrial air cleaners are a valuable tool for capturing most airborne nuisance particulate. Our self-contained filtration units continuously pull contaminated air through multiple stages of highly efficient micro-glass filters. The filtered air is then re-circulated back into the working environment without the need for duct work. This results in a cleaner, healthier atmosphere for employees, while saving you money by keeping heated or air-conditioned air inside your facility.

APPLICATIONS

- Welding smoke/fumes
- Grinding dust
- Bondo dust
- Oil mist
- Diesel fumes
- Printing powder
- Plastic dust
- Other smoke/dust contaminants

INSTALLATION METHODS

- Hung with chains
- Mounted with all-thread rods
- Installed using wall brackets

FEATURES

- | | |
|---|---------------------------------------|
| Disposable filters..... | Cleaner, healthier environment |
| Self-contained | Versatility to be used most anywhere |
| Easy installation & maintenance..... | Cost effective |
| Four way louvers | Airflow pattern control |
| 16 gauge powder coated construction..... | Durable |
| Filter change indicator (optional) | Identifies filter change needs |
| Multiple filter configurations available..... | Solutions to fit your specific needs |
| Easily relocated | Accommodates growth or space redesign |

BENEFITS

The **Air King** M-40 series of units are the 2 & 3HP, 3-phase, multi-cabinet option of our M-30C series. These units are generally used in areas where a heavier concentration of contaminants is being generated. They are most often used in multiples for larger areas to establish positive airflow patterns that will enhance the effectiveness of the units. The T-style configuration of these units has inlets on both ends and exhausts the filtered air from the center of the unit.

The M-40 series uses disposable filters that are easy to service and provide for simple, low-cost maintenance. These units offer increased filter surface area thus decreasing the frequency of filter changes required. Units can be configured in a number of ways, both vertically and horizontally, to best suit your specific needs.

| SPECIFICATIONS | M-40V (1 deep, 2 high) | M-40H (2 deep, 1 high) | M-40V3 (1 deep, 3 high) | M-40H3 (3 deep, 1 high) | M-40HD (2 deep, 2 high) | M-40HT (2 deep, 3 high) |

| Weight | 385 lbs | 435 lbs | 490 lbs | 585 lbs | 630 lbs | 830 lbs |
| Pre-filter (Merv 8) | (4) 24"x24"x4" Pleated | | (6) 24"x24"x4" Pleated | | (8) 24"x24"x4" Pleated | (12) 24"x24"x4" Pleated |
| Primary Bag Filter (Merv 11) | (4) 65%, 21" 8 Pocket Bags (236 ft²) | | (6) 65%, 21" 8 Pocket Bags (354 ft²) | | (8) 65%, 21" 8 Pocket Bags (472 ft²) | (12) 65%, 21" 8 Pocket Bags (708 ft²) |
| Volume (CFM) | 4000 CFM | | | | | |
| Motor | 2HP TEFC; 208-230/460/3/60; 6.0-5.8/2.9 amps | | | | | |
| Power | Wired to Junction Box | | | | | |
| Blower | 11 x 8 Belt Drive, Single Speed | | | | | |
| Construction/Paint | 16 Gauge; River Blue chemical resistant powder coating | | | | | |
| Noise Level 5' dBA | 72 dBA | | | | | |

Options: • 95% 8 Pocket Bag Filter (Merv 15)
• Chain, Q-Links, & Eyebolts Kit

• Strut Channel Hanging Brackets
• Silencer with 4-way louver (reduces sound by 6-8 decibels)
• Cast Eyebolts (set of 4, installed)

• Pressure Gauge/Filter Change Indicator
• Silencer w/non-directional grill (reduces sounds by 10-12 decibels)
• Aluminum Mesh Pre-filter (Replaces Pleated)
• Motor upgrade: 3 HP TEFCBB, 208-230/460/3/60; 8.6/4.3 amps
